

What readers are saying about *The Godhead Spot*:

“A thinking person's 'neurotheological thriller'! I liked the premise and the way the story unfolds -- much like the brain of the main protagonists unfolds -- lots of surprises, humor, and a wonderful weave of philosophical and scientific musing along the way -- don't want to give out any spoilers, but I'm hoping the ending means a sequel! I often read before bed, but found myself craving more of the story throughout the day and so broke my habit a bit and indulged myself over the weekend -- lol! Did not want to put it down and am still thinking about it quite a bit even now. Vivid pictures without the usual boring descriptive narrative - how did he do that?! Lots of interesting threads (that may or may not be resolved by the end), definitely likeable and some not so likeable characters, but you begin to understand their motivations by the end) -- it moves quickly, but you still have a sense of each chapter being complete and filled with enough storyline and detail so that you haven't missed a beat.”

MsP

“A really fun read and a real page turner.”

JKat

“The riveting multi-layered plot and character development along with an effective blend of good and evil left this reader wanting more.”

GEA

“A joy to read. I hated to finish it.”

S. Burke

“I was so engaged that I had trouble putting it down. I repeatedly marveled at how [the author] touched on so many themes: the intoxicating effect of power; human penchant for politicking instead of honest and vulnerable connection even in revered religious institutions; theatrical narcissism; violence in the name of rightness; embodied courage and compassion that exists in spite of evil; and so on. Both entertaining and very deep. Fun too; I laughed out loud a number of times!”

J. Krieder

“I just finished THE GODHEAD SPOT and congratulate St. Croix on a well-written medical/fantasy treatise on the brain's quirkiest functions. I was in the dark initially, but gradually came to see the light. The assorted characters were always a treat to follow and well-timed to show up just as you wonder what nefarious and non-nefarious things they were up to.”

E. Yaroch

“I devoured it in a matter of days. Very compelling, funny, thought-provoking, and fun to read.”

E. Goldberg
